EDUCATION

Instituto Tecnológico de La Laguna — B.S. Computer Science

Aug 2023 – Present

GPA: 96.21/100 (top of class) · 6th Semester · B2 English — TOEFL (2025)

- ▶ Relevant coursework: **Data Structures & Algorithms, Object-Oriented Programming, Graph Theory, Discrete Mathematics, Databases**
- ▶ Active participant in algorithm research and competitive programming, applying advanced CS theory to real problem sets.

TECHNICAL SKILLS

Languages: C++, Java, Python, Dart, SQL, JavaScript, HTML, CSS

Data Structures: Arrays, Linked Lists, Trees, Graphs, Hash Tables, Heaps, Segment Trees, Tries

Algorithms: Dynamic Programming, Graph Algorithms (BFS/DFS/Dijkstra), Binary Search, Sorting, Number Theory, Sieve of Eratosthenes

Frameworks: Flutter, Firebase, React

Tools: Git, GitHub, REST APIs, Mapbox API, Figma, Linux, OOP, Full-Stack Web Development, Mobile Development (iOS/Android)

Concepts: Object-Oriented Design, Algorithm Analysis (Big-O), Problem Solving, Software Engineering, Agile

COMPETITIVE PROGRAMMING

- ▶ 🏆 1st Place — UAC Inter-University Programming Contest 2026 (team "Yiyo y sus amigos")
- ▶ 🏆 59th / 140+ teams — ICPC Mexico Finals 2025, Guadalajara (team "Tutores Legales de Miguel Garza")
- ▶ 🏆 Top 38 overall — ICPC Mexican Regional Qualifiers 2025 (3 rounds)
- ▶ 🏆 #1 in Coahuila — All 3 ICPC Regional Qualifier rounds 2025 (team "Tutores Legales de Miguel Garza")
- ▶ 🏆 ICPC 2026 Regional Qualifier Round 1 — Top 60 (est. Top 40 post-freeze), 6 problems solved
- ▶ 🏆 9th Place — Coding Cup 2024 (team FailedOnTest1)

PROJECTS

RaiTec — Ride Coordination Mobile App

2025 – Present

Flutter · Dart · Mapbox API · Firebase · REST APIs · Mobile Development (Android/iOS)

- ▶ Designed and implemented a cross-platform mobile application using Flutter and Dart, following object-oriented design principles and MVC architecture.
- ▶ Integrated Mapbox REST API for real-time geolocation, interactive map rendering, and dynamic route calculation; implemented asynchronous data fetching and state management.
- ▶ Applied software engineering best practices: modular component design, Git version control with feature branching, and iterative testing.

SIREC — Scientific Journal Review Portal

2025

Full-Stack Web · Role-Based Access Control (RBAC) · SQL · OOP

- ▶ Built a full-stack web platform with role-based access control (RBAC) supporting 3 user roles (author, reviewer, manager), enforcing data access policies and workflow state machines.
- ▶ Designed relational database schema and implemented SQL queries for manuscript tracking, reviewer assignment, and status reporting.
- ▶ Reduced manual coordination overhead for journal editors by automating submission routing, notifications, and status transitions.

MU Kingg — Point of Sale System

2024

JavaScript · Full-Stack Web · REST APIs · SQL

- ▶ Developed a full-stack POS web application with inventory management, sales reporting, and user authentication modules.
- ▶ Implemented RESTful API endpoints for CRUD operations on product and transaction data, backed by a relational database.

TEACHING & LEADERSHIP

Competitive Programming Workshop — Instructor

2025 – Present

- ▶ Teach algorithms, data structures, and problem-solving strategies to students, covering graphs, dynamic programming, and number theory.
- ▶ Designed curriculum based on ICPC problem sets; directly contributed to students' advancement to regional-level competitions.

Algorithmics Community TEC Laguna — Co-Founder

2025 – Present

- ▶ Co-founded competitive programming community at ITL; organized weekly practice sessions, mock contests, and algorithm workshops.
